

CALL FOR PAPERS

MATHEMATICAL GEOSCIENCES SPECIAL ISSUE ON

Advanced Geostatistics for Environmental Applications

Guest Editors:

Emmanouil Varouchakis (Technical University of Crete, Greece)
Jaime Gómez-Hernández (Polytechnic University of Valencia, Spain)
Philippe Renard (University of Neuchâtel, Switzerland)
Dionissios Hristopulos (Technical University of Crete, Greece)

This Special Issue of Mathematical Geosciences is dedicated to geostatistics applied to environmental applications and will comprise a set of selected papers presented at geoENV2024, the 15th International Conference on Geostatistics for Environmental Applications, held in Chania (Greece) in June, 2024. The conference features sessions covering theory in geostatistics, multiple point statistics and spatio-temporal statistics in conjunction with applications in surface and sub-surface hydrology, soil geochemistry, health & environment, mining and geological applications.

Main topics:

Geostatistical theory and new methodologies	Surface and subsurface hydrology
Inverse modeling	Soil applications
Multiple point geostatistics	Health, epidemiology, ecotoxicology
Spatio-temporal processes	Environmental pollution and risk assessment
Ecology, natural resources	Remote sensing
Forestry, agriculture	

Timelines:

Full manuscripts should respect the journal's guidelines for authors and be submitted online using the [Editorial Manager system](#).

- Paper submission before: **October 30th, 2024**
- Return of reviews to authors before: **March 31st, 2025**
- Submission of final papers deadline: **June 30th, 2025**
- Publication: Late 2025

Submit Papers online through the journal's website

<http://www.springer.com/journal/11004>

When submitting, you must choose, under 'Select Article Type,' the SI: "Advanced Geostatistics applied to Environmental Applications" - "geoENV2024"

Submitted manuscripts must fully comply with the journal's [Instructions for Authors](#) in preparing manuscripts.
